

Upload shapefiles to add your fields

With this option, you can upload all your fields at once to xarvio FIELD MANAGER using shapefiles from existing fields. Simply upload the files in any of supported format to add your fields.

- After logging into FIELD MANAGER, click on **Add fields** on the **Status** page.
- From the pop-up screen, choose the **Upload shapefiles** option.

 Shape/boundary files are mandatory! If a file is corrupted, you will receive an error message. Please edit the boundaries of your fields manually to correct the error.

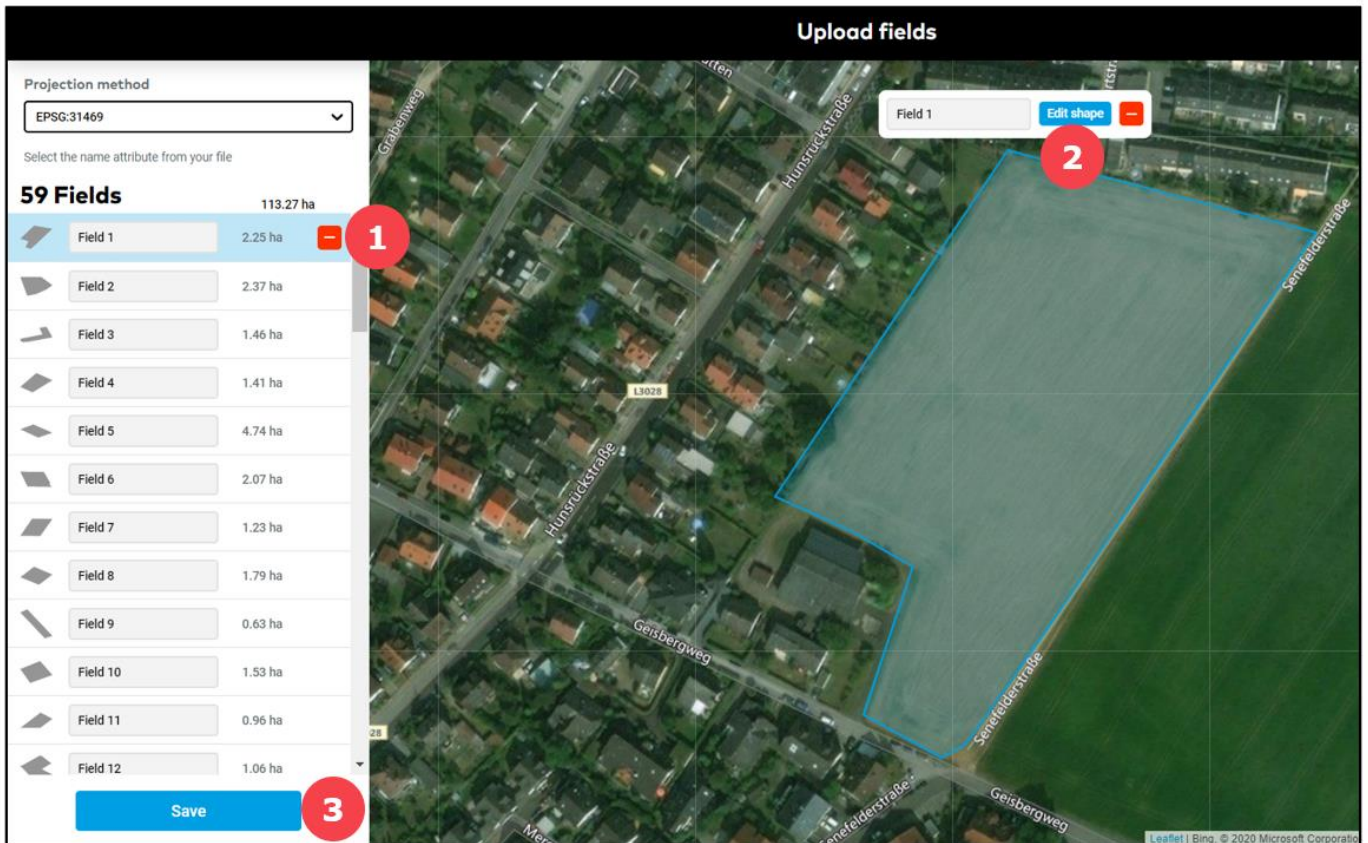

1. You can drag and drop the files here or click **Browse files** to select and upload them.
2. If you need support, reach out to us. We will be happy to help.

- Once files are uploaded, click **Review fields** to confirm field creation.

- On the next screen, you will see a list of uploaded fields.

1. You can enter a name for your field or remove the field from selection if required.
2. Click **Edit shape** to edit the boundaries of the field.

3. Once done, click **Save** and your fields will be ready for crop assignment.

The screenshot displays a farm management software interface. On the left, a sidebar shows a list of fields under the heading 'Status'. The main panel is titled 'Field 59' and shows a 4.94 Hectare field. It includes weather and climate data for the next four days, a notes section, and field management options like 'Management zones', 'A-B lines', 'Guidance pattern', and 'Field entrances'. A blue 'Assign crop' button is at the bottom. On the right, an aerial satellite map shows the field's location with a white outline. The map includes navigation controls and a copyright notice at the bottom: 'Landsat | Bing, © 2020 Microsoft Corporation, © 2020 TomTom, © 2020 Maxar, ©CNES (2020) Distribution Airbus DS'.
